Edgar Degas

(1834–1917)

Woman Putting on Her Stocking

Degas is most well known for his lovely oil paintings of ballerinas; over half his artworks show dancers. However, he also made sculptures out of bronze like this one.

This sculpture is cast from bronze and the plinth it stands on in the Gallery is made from wood. Can you draw the Degas sculpture on its plinth? or even design your own sculpture?
